

INTEROPERABILITY IN NEW ORLEANS: *COMPETITION TO COHESION*

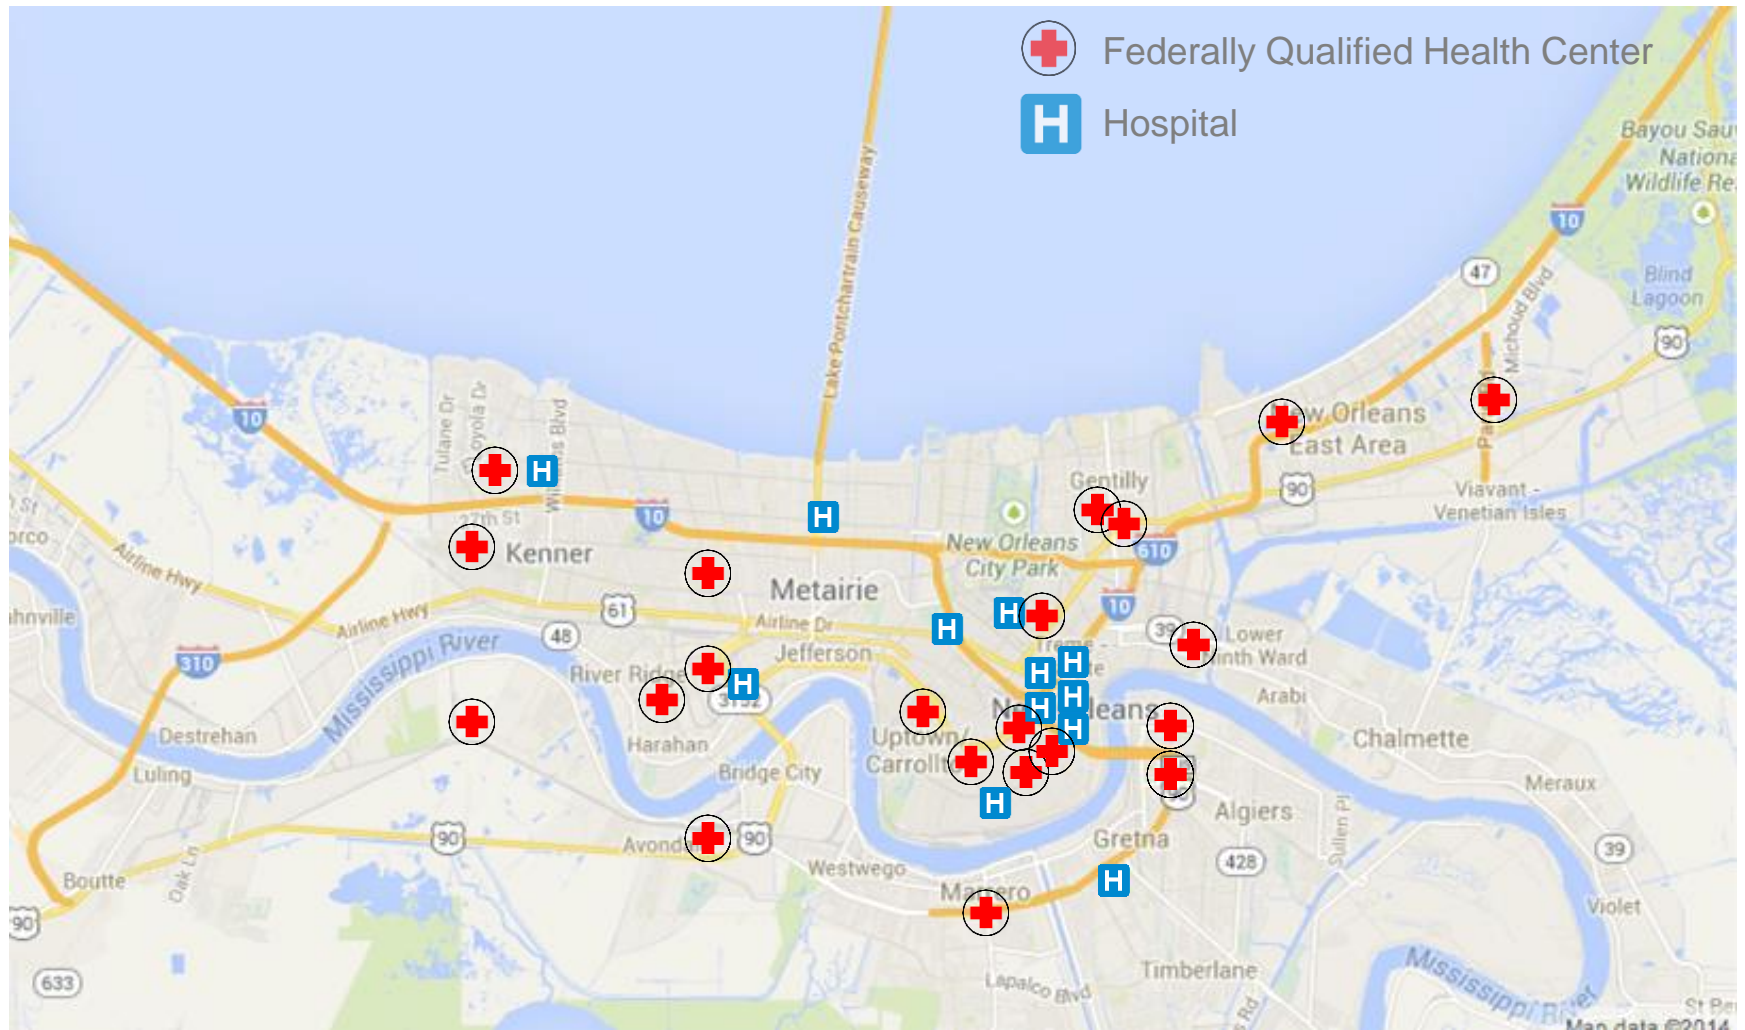

David Kulick

ICT & Innovation Program Officer

Johns Hopkins University Center for Communication Programs

May 5, 2014

New Orleans

Health Information Exchange Structure

Outcomes

1. HIT Interoperability – individual electronic medical records systems now connected
2. Reduction in waste through shared standards
 1. System wide quality improvements identifying costs, usage, and efficiency
 2. Improved operational efficiency of individual clinics in managing own infrastructure
3. Aligned structure of health clinics operating as a single entity improving efficiency and increasing revenue – Accountable Care Organization
